

Sergio Cavauiolo, - I am a senior Systems Engineer from Adelaide in South Australia with a Bachelor Of Engineering Degree in Electronics and have been working as a professional engineer for BAE Systems Australia (in Adelaide) for over 33 years on numerous aerospace, aircraft systems, navigation and radio communications projects (Refer [LinkedIn-Sergio-Cavauiolo](#)). Like many

MH370 Enthusiasts I have followed this mystery of Flight MH370 since the tragedy unfolded and in my own private time have spent the last nine years conducting my own research and investigations, studying many different aspects of this case from both a technical and logical perspective. I believe there is sufficient data and information that when corroborated, allows us to determine where Flight MH370 had actually gone, and therefore where the main fuselage wreckage can be found. With highest regard for human life and aviation safety, I hope to help the MH370 Community, in particular the Next-Of-Kin (NOK) of the 239 lost passengers and the Malaysian Government achieve closure, by helping this cause to locate the final resting place of the missing wreckage of Malaysia Airlines Flight MH370 and the 239 lost souls.
